

Internet Models and Behavior

The top conference in new Internet technologies is SIGCOMM (the ACM Special Interest Group in Communications). The top conference for publishing results of measuring and characterizing Internet behavior is IMC (Internet Measurement Conference).

1. Take a look at the SIGCOMM 2017 (<https://conferences.sigcomm.org/sigcomm/2017/program.html>) and IMC 2016 (<https://conferences.sigcomm.org/imc/2016/program.html>) programs. Choose one of the technical papers you're interested in. Write a 2-page description of the research, and what you think you might like to work on.
2. On a separate page, identify an area of Internet behavior that you would be interested in learning more about.

Create a pdf document for your work, and hand in your assignment by typing on a CADE machine:
