This assignment is a set of problems from the book that will give you practice manipulating Boolean expressions. It looks like a lot, I think they’ll go quickly.

1 - Problems 2.2, 2.3 (these are repeats from HW2, but this time use Boolean algebraic manipulation to show that the expressions are equivalent)

2 - Problems 2.10, 2.13, 2.24, 2.25, 2.30, 2.35, 2.38, 2.48, 2.49
