Assignment 1.10i: Standards and Testing Plan

In your groups, look back at your Design Requirements. Discuss how you will need to test your prototype to make sure the requirements have been met.

Discuss with your group ways in which a user would normally use your design and how they might use your design in unintended ways. Discuss how you might test your product to make sure it will withstand this use satisfactorily and the product will have desired quality.

Describe 3 tests you would perform on your prototype to ensure that design requirements have been met and ensure your product quality.
