Assignment 5.6.1: Final Prosthetic Arm Design Testing and Reflection

Write answers to the following questions about your prosthetic arm design and test performance in your notebook:

1. What about your arm design worked well during testing?
2. What did not work well?
3. What would you do differently to improve your design?
4. Create a sketch of your arm as it was built. Label the materials used and include dimensions.
5. What changed from the original design and why?
6. What were the final materials used and final cost of your arm?
