Instructor: Dr. Ling Zang  
Office: Room 5543 SMBB building, 36 South Wasatch Dr.  
Office Hours: 2pm – 4pm, MWF, better by appointment (5th floor of SMBB can only be accessed by authorized ID)  
Phone: 801-587-1551  
Email: LZang@eng.utah.edu  
Course web: http://www.eng.utah.edu/~lzang/teaching

TA: Marcus Parry  
Office:  
TA Hours: by appointment  
Phone: (303) 704-2490  
Email: marcus.parry@utah.edu

Pre-requisites: Graduate Standing  
Lecture: MWF 10:45 AM – 11:35 AM, LS 111  
Lab: N/A  
Credit Hours: 3

Text(s): No Textbook required.  
Lecture Notes & other course materials can be downloaded from the course website:  
http://www.eng.utah.edu/~lzang/mse5034&6034.html  
Since we don't have a primary Textbook, the Lectures notes, together with the additional readings thus provided, are expected to offer sufficient knowledge and information that are needed for well-round understanding of Kinetics. To correlate the "abstract" Kinetics theory to the real practice of materials science engineering, we provide various such real-world examples that help understand the beauty and powerful application of the theories.

Course Description: Rate theory and diffusion applied to nucleation, crystal growth, grain growth, recrystallization, precipitation, sintering, and solid-state reactions; role of kinetics and
thermodynamics in development of microstructures. Designed to teach first year graduate students in materials science and engineering the basic rate and its application to such solid state phenomena as diffusion solidification and transformations in solids involving nucleation and growth, spinodal decomposition, and martensistic transformations. The design of experimental techniques to solve materials-related problems is emphasized. Graduate students will be required to complete additional assignments as instructed. This course is part of the MSE Core Competency for incoming graduate students. This course is required for all incoming graduate students.

Choose an item.

**Content Overview:** The objective of this course is to learn the basic concepts and fundamental principles of kinetics of materials and how to apply them to solve real-world materials problems.

**Grading & Evaluation Methods:** Homework: 20% (No Makeup); Midterm: 30%; Final: 50%.
Homework due in two weeks after assignment (turn-in date to be announced). 20% grade deduction to be applied for each week of delay of turning in.

**Key Dates:**
Monday, January 15th - Martin Luther King Jr. Day, Holiday
Wednesday, January 19th - Last day to drop classes
Monday, January 19th - Last day to add classes
Monday, February 20th - Presidents’ Day, Holiday
Friday, March 2nd - Last day to withdraw from classes
Sunday – Sunday, March 18th - 25th - Spring Break
Tuesday, April 24th - Last day of classes
Wednesday, April 25th - Reading Day
**Friday, April 27, 10:30 am–12:30 pm - Final Exam**

**Americans with Disabilities Act Statement:** “The University of Utah seeks to provide equal access to its programs, services and activities for people with disabilities. If you will need accommodation in the class, reasonable prior notice needs to be given to the Center for Disability Services, 162 Union Building, 581-5020
(V/TDD). CDS will work with you and the instructor to make arrangements for accommodations.”

Faculty and Students’ Responsibilities: “All students are expected to maintain professional behavior in the classroom setting, according to the Student Code, spelled out in the Student Handbook. Students have specific rights in the classroom as detailed in Article III of the Code. The Code also specifies proscribed conduct (Article XI) that involves cheating on tests, plagiarism, and/or collusion, as well as fraud, theft, etc. Students should read the Code carefully and know they are responsible for the content. According to Faculty Rules and Regulations, it is the faculty responsibility to enforce responsible classroom behaviors, and I will do so, beginning with verbal warnings and progressing to dismissal from class and a failing grade. Students have the right to appeal such action to the Student Behavior Committee.”
